## JUGALA

<b>Origin:</b>	Cross of Gala and Jersey mac, Switzerland						
<b>Blossom date:</b>	Mid-Season – same as Golden Delicious						
<b>Pollinators:</b>	Braeburn, Cox, Malus						
<b>Picking date:</b>	5 to 6 days before Mondial Gala						
<b>Growth:</b>	Average						
<b>Fruit size:</b>	70-85 mm						
<b>Productivity:</b>	Time till first cropping is rapid Yields is good susceptibility to alternate bearing is low Thinning: easier than Mondial Gala						
<b>Fruit:</b>	<table><tr><td>Skin:</td><td>Carmine red colour with stripes; Very good colour level, comparable to Galaxy</td></tr><tr><td>Flesh:</td><td>crisp and juicy</td></tr><tr><td>Taste:</td><td>Sweet</td></tr></table>	Skin:	Carmine red colour with stripes; Very good colour level, comparable to Galaxy	Flesh:	crisp and juicy	Taste:	Sweet
Skin:	Carmine red colour with stripes; Very good colour level, comparable to Galaxy						
Flesh:	crisp and juicy						
Taste:	Sweet						
<b>Storage:</b>	<table><tr><td>Cold storage:</td><td>December,</td></tr><tr><td>CA-storage:</td><td>March</td></tr></table>	Cold storage:	December,	CA-storage:	March		
Cold storage:	December,						
CA-storage:	March						
<b>Special</b>	Earlier picking date: interesting for early sales and to spread the picking window.						

**New sport of Gala characterized by its earlier picking date (5 to 6 days earlier than the standard Gala) and its better fruit size. The colour is similar to Galaxy.**
